Payer Services

Document Management

The diagram consists of six hexagonal nodes arranged in two columns. The left column has three nodes (green, blue, red) and the right column has three nodes (pink, orange, purple). Each node contains a specific document management function. The nodes are interconnected by a network of grey lines, with a horizontal line extending from the top-right node to the right edge of the frame and another from the bottom-left node to the left edge of the frame.

Documents by a document management system are regulated

Linking Records to Business Process

Capture a variety of file

Distribution & Security

Metadata

Periodically review the storage capacity
