

Company Overview

Who We Are

M-P Infrastructure was established in 2008 in Nigeria as a local Infrastructure Services Company affiliated to Mast Projects Nigeria Ltd, the African Telecommunications equipment supplier.

Since its inception, M-P Infrastructure has offered turnkey telecommunications network infrastructure solutions that include supply and installation of equipment, equipment testing, commissioning and maintenance of telecommunication networks. The company has grown to become one of the fastest growing Infrastructure solutions providers across West Africa. Our Infrastructure capacity cuts across several industry sectors technology, power, energy, aviation, health and transport. The company, whilst committed to the delivery of excellence through state of the art products and services, recognizes the importance of close control over all aspects of a project. It is able to offer resources to provide initial planning, preparation and clarification of specifications, supplier selection and management, deployment, operations and maintenance.

Our Mission

Our mission is to create a cross industry infrastructure and facilities services company, characterised by Integrity, professionalism and commitment to our client and our people.

Our People

At M-P-Infrastructure, we believe our greatest strength is in our resources; and to keep growing, we invest substantially in human capital development and pride ourselves in attracting, developing, and retaining the best resources in our marketplace.

Our Vision

To be a premium cross industry infrastructure service provider of choice by providing strategic services tailored to our clients' needs.

Our Strategic Alliances

M-P Infrastructure has strategic alliances with internationally renowned companies in the engineering design of infrastructure facilities, supply, testing and commissioning of telecommunication, power and utility service equipment and products.

Amongst them we have:

- Mast Projects SA, Nigeria & Ghana
- Resource Plus Ltd Nigeria & Ghana
- Microqual India
- Aster Infrastructure Services India
- Sonar limited

Specialist Infrastructure Services

We work in Private and Public Private Partnerships to develop specialist infrastructure requirements such as:

- Housing Developments
- Shopping Malls
- Road Projects
- Turnkey Design, Build of Greenfield prisons, hospitals, Process and Industrial Plants, Structural and Civil works.
- Transmission Line Planning, Procurement, Erection and Stringing Works

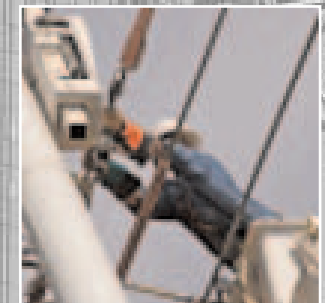

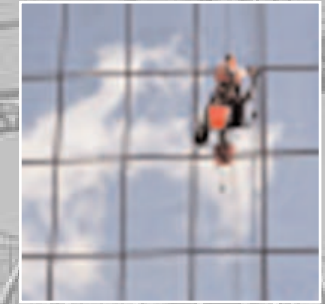

Facilities Management Service

We offer a single point of contact for all our client's facilities management requirements. At M-P Infrastructure we enable our clients to have peace of mind whilst they focus on their core business.

We have highly skilled personnel with extensive experience in providing integrated services such as:

- Building maintenance. General Maintenance, electrical, mechanical, plumbing and generators.
- Pipe line and pump station maintenance
- Offshore platform general and telecommunication equipment maintenance (Team of qualified Rope access Technicians)
- Window cleaning on high rise buildings
- Power transmission line and tower maintenance
- Airport Infrastructure Maintenance

Warehouse Facilities

Our warehouse is strategically located at Lagos – Epe Expressway, Ajah, Lagos. The Warehouse is 8400 square metres, equipped with forklifts and other materials handling equipment for fast loading and offloading of materials and equipment. The warehouse has capacity to hold telecoms and power masts, generators and other engineering equipment and maintenance spares to service several project and maintenance sites concurrently.

M-P Infrastructure as an affiliate of Mast Projects which normally holds in stock at any given time 400 units of telecom towers and other turnkey materials and equipment, and distributes telecommunication equipment throughout Africa. This creates great synergy and leverage for reduction in lead time and cost effective supply chain and logistics for better service delivery to our clients.
